

UNEXPECTED OUTCOMES

Navigating Scientific and Management Land Mines

The unexpected happens. Seasoned life science entrepreneurs provide real world examples of the challenges that inevitably develop for start-up life science companies. They will also deconstruct the ways obstacles in the lab, the boardroom and with management are resolved.

Paul Pescatello, J.D., Ph.D. (Moderator)
President and Chief Executive Officer
CURE (Connecticut United for Research Excellence)

Michael Kishbauch, Ph.D.
President and CEO
Achillion Pharmaceuticals Inc.

Tom Wood
Founding CEO
Applied Spine Technologies, Inc.

Ron Lennox, D. Phil.
Partner
CHL Medical Partners

DATE

November 13, 2008

3:30 pm Registration

4:00 pm Seminar

5:00 pm Networking, Refreshments
& Wine Bar

LOCATION

The Anlyan Center Auditorium
Yale University Medical School
300 Cedar Street, New Haven, CT

RSVP REQUIRED

Registration is free, but please RSVP in advance

The Yale BioHaven Entrepreneurship Series features monthly educational panels designed to showcase regionally developed life science technologies that have progressed along the path to commercialization. Speakers at the BioHaven events represent both the scientific and business side of the enterprises. The programs focus on key success factors of each company, scientific or technological advantage, business model and lessons learned in starting and developing the business. The series also serve as social networking opportunities for scientists/researchers in the Yale community.
