

SCIENCE WITHOUT FICTION

Talking Science, Not Talking Like Scientists

February 8th, 2011 - 6PM - **FREE ADMISSION**

Leitner Family Observatory and Planetarium

355 Prospect St., New Haven, CT 06511

The Milky Way Galaxy: 200 billion stars

• = our solar neighborhood, where all the stars visible to the unaided eye are located

OUT OF THIS WORLD

The Anatomy of a Galaxy, Inside and Out

Three astronomers from Yale tackle some of the biggest mysteries in the universe (literally!). Did you know that some galactic clusters are so large that they make up over 5% of the known universe? And can travel through space at over 1000 meters per second? You will, along with other interesting, weird and just plain cool facts as we explain the latest science news without any of the jargon.
