LASERS AND ANTI-LASERS: TURNING ON THE DARK

Dear James Bond: The next time a laser beam threatens to cut you in two, try switching it into reverse. Two scientists at Yale University have built the laser's first doppelganger: the anti-laser...

Fox News, Feb 17, 2011

Find out what Fox got right, and what they got wrong, as Professor **A. Douglas Stone** explains what a laser is, and how he, with his Yale colleague Professor Hui Cao, demonstrated a device which is equivalent to running a laser backwards.
