

Associate Analyst

Associate analyst to work with a biotechnology equity research team as part of a broad healthcare research platform.

Responsibilities include creating and maintaining financial models, assessing drug markets and competitive landscapes, composing research reports, analyzing market trends, attending scientific and investor conferences, interacting with institutional buy-side clients, and supporting senior analyst day-to-day functions.

Qualifications:

Qualified detail-oriented candidates with high ambition must have a good financial background, a desire to learn, and excellent writing proficiency. Previous experience in healthcare finance or equity research preferred, but not required. Knowledge of biology, medicine, drug development, or other life science related field a plus.
