

**Reata Pharmaceuticals, Inc.** is a biopharmaceutical company dedicated to the discovery, development and commercialization of new drugs to treat intractable diseases. Reata is located amongst the attractive northwest suburbs of Dallas, TX.

### **ANALYST, PRODUCT DEVELOPMENT**

Working with product development team, primary role is to assist in analyzing, developing and implementing strategies to move assigned product candidates expeditiously from preclinical stages to proof of concept in clinical studies.

### **Qualifications**

Candidates will have a doctoral degree (required) with a focus in renal, cardiovascular, metabolism or immunology-related diseases (preferred). Candidates with a background in Nrf2 pharmacology are encouraged to apply. An M.D. or Ph.D. with translational/clinical experience is preferred. Candidates must have excellent writing and communication skills, as well as work well both independently and in a team setting.

### **Responsibilities**

#### Preclinical

- Will further elucidate mechanism of action of product candidates.
- Will determine biomarkers of activity that can be assayed in clinical studies.
- Will help in designing, implementing, and analyzing preclinical studies.
- Will contribute to study reports, abstracts, publications, and presentations.

#### Clinical

- Will perform detailed analyses in order to benchmark product candidates.
- Will work with team members to arrange, obtain, assay, and analyze relevant biomarkers.
- Will work with team members to determine appropriate correlative studies, endpoints, and inclusion/exclusion criteria for clinical studies.

In addition to competitive salaries and a challenging work environment, we offer a comprehensive benefit package including medical, dental, vision, STD/LTD, and a 401(K) saving program. Must be legally authorized to work in the U.S. without sponsorship. Reata Pharmaceuticals is an Equal Opportunity employer.
