

For more than 30 years, Genentech has been at the forefront of the biotechnology industry, using human genetic information to develop novel medicines for serious and life-threatening diseases. Today, Genentech is among the world's leading biotech companies, with multiple therapies on the market for cancer and other serious medical conditions. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset.

The following opportunity exists in our South San Francisco, CA, headquarters:

Scientist (Technology) - Assay & Automation Technology

Responsibilities:

We are seeking a highly motivated, interactive and creative Scientist to join the Assay and Automation Technology department. Responsibilities will include the development and implementation of high-throughput cell-based assays. Using large collections of arrayed cDNA and siRNA, the successful candidate will discover new drug targets through expression cloning and knockdown screens while taking full advantage of state-of-the-art automation. He/she will collaborate extensively with other investigators in Research and must be able to work effectively in a highly networked environment.

Requirements:

This position requires a Ph.D. level scientist with at least two years of postdoctoral training in Cell Biology or a related field and a superior record of professional achievement as documented by publications and patent filings. The successful candidate will be a laboratory scientist with hands-on knowledge of state-of-the-art cell-based assay methodologies and automation technologies. This position requires excellent optimization and troubleshooting skills, superior organizational talent and keen attention paid to details. The candidate should also have outstanding communication skills in order to succeed in a teamwork-oriented, multi-faceted environment.

Genentech is dedicated to fostering an environment that is inclusive and encourages diversity of thought, style, skills and perspective.
