

For more than 30 years, Genentech has been at the forefront of the biotechnology industry, using human genetic information to develop novel medicines for serious and life-threatening diseases. Today, Genentech is among the world's leading biotech companies, with multiple therapies on the market for cancer and other serious medical conditions. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset.

The following opportunity exists in our South San Francisco, CA, headquarters:

Senior Research Associate - Immunology

Responsibilities:

A Senior Research Associate position is available for a highly motivated and skilled candidate to perform research in the field of Immunology. The individual will focus on the elucidation and characterization of molecular pathways regulating innate and adaptive immune cell function and interactions between hematopoietic and non-hematopoietic cellular compartments. These studies will utilize a combination of biochemistry, molecular, cellular and genomic approaches in both in vitro and in vivo systems with the goal of discovering and validating novel therapeutic candidates.

Requirements:

Applicants should have a strong background in immunology and a Master's degree in biological sciences with at least five years of additional research experience in the fields of immunology, molecular biology or cell biology. PhD level candidates are encouraged to apply. Additional qualifications include demonstrated independence in research organizational skills and the ability to function well in a team environment.

Genentech is dedicated to fostering an environment that is inclusive and encourages diversity of thought, style, skills and perspective.
